GENERAL CONTROLS

The following are general controls referred to in this manual. In most instances, the **Control Pad** is used to move your current Hero in all directions, the **A Button** causes Heroes to jump and the **B Button** controls attacks. Press up on the Control Pad to make Heroes look up. Press Down on the Control Pad to crouch and look down. Press the **Start Button** to pause – press again to resume the game. Specific controls for different Heroes and vehicles follow on pages 9-15.

SCREEN DISPLAY

During your adventure, your current Hero's Icon will appear in the upper left corner of the screen. Next to this is the Hero's Health Sword. The Health Sword shows the amount of damage your Hero has taken by decreasing in height towards the handle. If your Hero's Health Sword becomes entirely dark, you will have to begin from the beginning of the level or from the last continue point found (see page 7). Below your Hero's Icon is a number showing the remaining Lives. If your Hero runs out of lives, the game will end and you will be given a password to continue from the beginning of that level at a later time.

Weapon Power Up – Collect this icon to increase the amount of damage your Hero's weapon causes to enemies.

R2-D2 – This faithful astromech droid can't actually be picked up, but if you touch R2-D2, he will act as a continue point, guiding you back to that location in a level in case you lose a life further on. R2-D2 may even lead you to a new area of your mission.

THE REBEL FORCES

The evil Imperial forces currently have the upper hand. The Rebel Alliance must successfully complete several complex missions in order to defeat the Empire. At the beginning of each mission, you must select one of the available freedom fighters. Each of the Rebel Heroes has their own skills and abilities. At the Select Hero Screen, you may be allowed to select from one or more available Heroes. The suggested Hero for that mission will already be highlighted, but if you wish to select a different Hero, move the Control Pad Left or Right and press the Start Button to begin.

MISSIONS

Rescue Han from Jabba the Hutt

To rescue Han Solo, Luke, Leia and Chewie must cross Tatooine's treacherous Dune Sea. This harsh environment contains many dangers: sandworms, fire eruptions, winged lizards and the scavenging Jawas. Your goal is to locate the entrance to Jabba's Palace and make it past the gate sentry.

Inside Jabba's Palace, our Heroes battle the bounty hunters in Jabba's employ, Gamorrean Guards, dancing slaves, crushing hydraulic plates, trap doors in the palace floor and Jabba's familiar, Salacious Crumb make getting through the palace difficult. Once Han is released from the carbonite, the battle isn't over: Luke is dumped into a dungeon with an enormous rancor monster, which must be dealt with.

Infuriated with the Heroes' success, Jabba captures them aboard his sail barge, threatening to drop the rebels into the dreaded Sarlacc's pit. Our heroes must traverse moving platforms and defeat attack droids, automated laser cannon and Jabba's vilest bounty hunters, including Boba Fett!

Knock out the Shield Generator

Escaping Tatooine, Luke, Han, Chewie and Leia race to the moon of Endor to destroy the shield generator that protects the new Death Star. Upon arrival, the Rebels are spotted by Imperial biker scouts. Luke or Leia must jump on one of the speeder bikes and stop all the scouts before they report the Rebel's location.

As Han Solo says, "Short help is better than no help."

The Rebels must enlist the aid of Endor's native Ewoks to find the shield generator. Wicket must climb through the trees of the Ewok village, pursued by giant lizards, insects and other unusual wildlife, as well as Imperial troopers and hover droids.

Han and Chewie enter the power generator through a secret entrance. Expecting an easy victory, the Rebels are surprised by the Emperor's trap! A full garrison of the Empire's troopers and defenses await them. Work your way through defense drones, proximity grenade launchers, and moving platforms within the generator to reach and destroy the power conduit.

Defeat the Dark Side

Luke Skywalker has decided that he alone must face Darth Vader – he can sense the good still inside him and must try to turn him away from the dark side of the Force. Aboard the new Death Star, Luke must find his way through the corridors and defenses to find and challenge Vader – his own father.

Luke was right about Anakin Skywalker – but the Emperor is pure evil and plots for Luke to take Vader's place at his side. Emperor Palpatine and his guards must be dealt with – and quickly – the assault fleet is on its way. May the Force be with you!

Destroy the Death Star

General Lando Calrissian and Nien Nunb aboard the *Millennium Falcon* lead the Rebel assault fleet in the attack against the Death Star. Now that the power generator has been destroyed, the Death Star's protective shield is down and the attacking ships can enter the battle station and make their way towards the central power core. Imperial TIE fighters and defensive laser cannons will do their best to make this a difficult mission, but you must succeed and defeat the Empire!
